

VPDES Permit Application Addendum

1. **Entity to whom the permit is to be issued:** Haymount (Fredericksburg) ASLI V LLLP

Who will be legally responsible for the wastewater treatment facilities and compliance with the permit? This may or may not be the facility or property owner.

2. **Is this facility located within city or town boundaries?** Yes ☒ No ☐

3. **Provide the tax map parcel number for the land where the discharge is located.** 11-2-A

4. **For the facility to be covered by this permit, how many acres will be disturbed during the next five years due to new construction activities?** 461.5 acres

5. **What is the design average effluent flow of this facility?** .58-.96 MGD

For industrial facilities, provide the max. 30-day average production level, include units:

In addition to the design flow or production level, should the permit be written with limits for any other discharge flow tiers or production levels? Yes ☐ No ☒

If "Yes", please identify the other flow tiers (in MGD) or production levels:

Please consider the following questions for both the flow tiers and the production levels (if applicable): Do you plan to expand operations during the next five years? Is your facility's design flow considerably greater than your current flow?

6. **Nature of operations generating wastewater:**

Serve 4,000 private residences, treat domestic and non-domestic waste from Haymount

Phase 1-A 60% of flow from domestic

Phase 1-B 100% of flow from domestic

Phase 1-C 79 % of flow from domestic

Number of private residences to be served by the 4,000 at build out

Phase 1-A 40% of flow from non-domestic

Phase 1-C 21% of flow from non-domestic

7. **Mode of** ☒ Continuous ☐ Intermittent ☐ Seasonal

Describe frequency and duration of intermittent or seasonal discharges:

8. **Identify the characteristics of the receiving stream at the point just above the facility's discharge point:**

Permanent stream, never dry

X Intermittent stream, usually flowing, sometimes dry

Ephemeral stream, wet-weather flow, often dry

Effluent-dependent stream, usually or always dry without effluent flow

Lake or pond at or below the discharge point

Other:

9. **Approval Date(s):**

Caroline County

O & M Manual

Sludge/Solids Management Plan

Management Plan

Have there been any changes in your operations or procedures since the above approval dates? Yes ☐ No ☒

10. **Privately Owned Treatment Works**

If this application is for a privately owned treatment works serving, or designed to serve, 50 or more residences, you must include with your application notification from the State Corporation Commission that you are incorporated in the Commonwealth and verification from the SCC that you are in compliance with all regulations and relevant orders of the State Corporation Commission. Incorporated also includes Limited Liability Companies (LLCs), Limited Partnerships (LPs) and certificates of authority.

11. **Consent to receive electronic mail**

The Department of Environmental Quality (DEQ) may deliver permits and certifications (this includes permit issuances, reissuances, modifications, revocation and reissuances, terminations and denials) to recipients, including applicants or permittees, by electronically certified mail where the recipients notify DEQ of their consent to receive mail electronically (§ 10.1-1183). Check *only one* of the following to consent to or decline receipt of electronic mail from DEQ as follows:

- ☐ Applicant or permittee agrees to receive by electronic mail the permit that may be issued for the proposed pollutant management activity, and to certify receipt of such electronic mail when requested by the DEQ.

If yes, provide email: _____

- ☒ Applicant or permittee declines to receive by electronic mail the permit that may be issued for the proposed pollutant management activity.
